STEEL AND CONSTRUCTION MATERIALS

dti **TATAK PINOY**

STEEL ASIA
TIBAY NG PILIPINO

SteelAsia is the country's flagship steel manufacturer and one of the largest steel producers in Southeast Asia, with four rebar mills across the archipelago and a combined capacity of 2.4 million tons per year with steel facilities in Bulacan, Batangas, Cebu, and Davao City.

Recently, SteelAsia became the first Philippine company to export steel bars and has shipped a total of 87,000 metric tons to Canada as of January 2020. SteelAsia has also become a global benchmark for producing steel with one of the lowest CO2 emissions in the world, putting the Philippines at the forefront of the development of Green Steel internationally. With plans for new facilities that could avoid seven (7) million tons of CO2 per year, SteelAsia's green steel methodology involves a combination of recycling and renewable energy.

2. DWIZ interview: Exposing graft, rice smuggling, and the threat to Philippine industries – By: FPI CE, Dr. Jesus Lim Arranza

I was invited as a guest commentator on DWIZ News TV this Sunday. During my discussion with news anchor Drew Nacino, we delved deeply into the pervasive and systemic graft and corruption within the government. I referred to these corrupt officials using a striking Filipino phrase—“matatapang ang apog”—and emphasized that they are perpetrating the gravest crimes against the Filipino people.

I asserted that administrative and criminal charges should be filed against these corrupt officials. However, I cautioned that haste makes waste; the cases must be airtight and thoroughly studied to ensure that they lead to conviction and imprisonment.

I was asked to respond to former Rep. Zaldy Co's accusations implicating the First

Lady in rice smuggling. I noted that when a person feels cornered, they often resort to attacking. There's a saying that when your back is against the wall, the best defense is a strong offense. That's what Zaldy Co is now doing. Furthermore, I emphasized that Zaldy Co's claim of having gained nothing from the corruption he initiated is greatly unbelievable. The Civil Aviation Authority of the Philippines has identified a total of 13 aircraft, which include planes and helicopters, worth approximately P4.7 billion, registered under his companies such as Misibis Aviation, Hi-Tone Construction Development Corp., and QM Builder.

During our discussion on rice smuggling, I explained that this is a longstanding issue in which I played a role in identifying the

kingpin of rice smuggling in the Philippines. In one of the Senate hearings, my testimony revealed that Davidson Bangayan is the same individual as David Tan, the suspected leader of a major rice-smuggling syndicate, which led to Tan's prosecution. Authorities should monitor him closely and investigate those linked to him, as I am still curious about what happened to the rice-smuggling case against Bangayan, also known as David Tan. Why don't you look for this guy?

How can Zaldy Co connect the First Lady or the President to rice smuggling? I can confirm that President Marcos is actively combating smuggling. One notable instance involves the illegal importation of palm olein, which unscrupulous traders

have been bringing into the country duty- and tax-free, falsely claiming it's intended for animal feed production. This issue was brought to light by the Coconut Oil Refiners Association (CORA), where I serve as the lifetime president. Additionally, former House Ways and Means Committee Chair Joey Salceda has highlighted that the government has lost approximately P45 billion in taxes and duties due to these illegal imports over the past six years. Armed with documents provided by my CORA members, I wrote to President Marcos seeking assistance from Malacañang. (Continue reading: <https://businessmirror.com.ph/2025/12/03/dwiz-interview-exposing-graft-rice-smuggling-and-the-threat-to-philippine-industries/>)

3. Barges are sometimes better than ships - By: Ernesto M. Ordoñez

MANILA, Philippines — When we think of transporting agricultural goods to a separate island, we think of ships. But in many cases, barges are far better in our archipelago, says Danilo Fausto, president of the Philippine Chamber of Agriculture and Food, Inc. (PCAFI).

Fausto is a finance expert, a very successful grower of livestock and crops, and has shown exceptional leadership. He led PCAFI so well that it now has 52 different agriculture subsectors. When asked to explain why barges are critical to agriculture, Fausto said the following:

Our terrain

"The fundamental problem of Philippine agriculture is geography. While economists call for trade liberalization and increased competitiveness for our agriculture sector, they seem to fail to consider that we don't have a level playing field in order to compete effectively.

"Our Asean (Association of Southeast Asian Nations) neighbors and trading partners have contiguous land areas, except Indonesia. The Philippines is a nation separated by 7,641

islands, with 2,000 islands that are inhabited and 5,000 islands more to be named.

"To be competitive, we submit that we need to connect these islands together to reduce costs and solve logistics and supply chain problems, not by the costly roll-on roll-off ship (ro-ro) that can accommodate around 10 to 15 delivery trucks as the supply vehicle between islands.

We should use container barges, which can load up to 100 containers, relieving our ro-ro ships of 200 trucks back and forth per day and long lines of waiting between ports."

Access to logistics

"The common denominator among agriculture export powerhouses like Thailand and Vietnam is easy access to container logistics that reach all the way to the farms. In the Philippines, this capability is also partly present in Davao and Cagayan de Oro, where the export farms are served well by nearby container ports," Fausto said. (To read/view the full article follow this link: <https://business.inquirer.net/559374/barges-are-sometimes-better-than-ships>)

4. FPI Golf Tournament

The poster for the 18th FPI Golf Classic features a central illustration of a golfer in mid-swing on a green field with trees in the background. At the top, a silhouette of a golfer is shown hitting a ball into a hole. The text '18TH' is in a small box, followed by 'FPI' in large green letters and 'GOLF CLASSIC' below it. Below the title, it says 'CO-PRESENTED BY:' followed by logos for International Container Terminal Services, Inc., Manila Multipurpose Terminal, and pmftc. The event details are listed: '16 DEC • ORCHARD GOLF', '7AM SHOTGUN TEEOFF', and 'INDIVIDUAL REGISTRATION: P7,000'. A QR code is labeled 'SCAN TO REGISTER'. The bottom section lists sponsors under the heading 'THANK YOU TO THE FOLLOWING SPONSORS'.

THANK YOU TO THE FOLLOWING SPONSORS

SPONSORS: MERALCO, Jollibee Group, MOTOLITE PANGMATAGALAN, Coca-Cola, EUROPACIFIC ABOITIZ PHILIPPINES, AboitizPower, wipac, ELITE, SGV, Columbus, JBL, SONO SODA, 3 STROKES, CeMAP, MERBAU CORPORATION, CONCREAT, Crystal Sugar Company, Inc., FILINVEST LAND, INCORPORATED.

The Federation is delighted to revive one of its most anticipated events—the Annual FPI Golf Invitational—scheduled for December 16, 2025, at the Orchard Golf and Country Club, with a shotgun start at 7:00 AM. This is in line with FPI's mission to strengthen Philippine industry, this special tournament serves as a fundraising initiative to support and expand FPI's advocacy programs—ensuring we continue to champion the growth, integrity, and competitiveness of our industrial sector. If you are keen about being a sponsor to this event or for any further information, you may also reach the FPI Secretariat thru the ff: Tel. Nos.: (632) 8722-3409, 8584-9642, 8727-4359 Fax: (632) 8722-9737 | Email: fpi@fpi.ph | Website: www.fpi.ph.

5. FPI Committee

FPI Environment Committee

The screenshot displays a Zoom meeting interface. At the top, the meeting title is 'FPI Environment Committee'. The participants list on the right includes: FPI Fritz Galero (Co-host, me), Shelly Manto (Host), LeoBManaus Jr, Homer Maranan, PCG IP, Lloyd Arcedo, Micaela Rogers, and Tom Daniels. The main window shows a shared document titled 'guide - Saved to this PC'. The document content reads: 'Philippines could bring to an end the primary source of ULAB of informal/legal recyclers by ensuring that new batteries, before introduction to the Philippine market, is required to have its own DENR-accredited recycling facility or partner with a DENR-accredited recycling facility. Should be included in the requirement in securing PS (Philippine Standard) Mark or IGC (Import Commodity Clearance) Sticker'. The bottom of the screen shows the Zoom toolbar with options like Audio, Video, Participants, Chat, React, Share, Host tools, AI Companion, Apps, Breakout rooms, More, and Leave. The system tray at the bottom indicates the date as Nov 27, 2025, and the time as 4:45 pm.

FPI-Lead-Acid Battery Recycling Initiative (LABRI) Meeting held on Thursday, 27 November 2025, 4:00PM via Zoom. The purpose of the meeting is to launch collaboration between the Federation of Philippine Industries (FPI) and LABRI to develop policy recommendations addressing informal lead-acid battery (LAB) recycling and associated lead-poisoning risks.

FPI Environment Committee-Subworking Group (SWG) Meeting, 03 December 2025, 10:00AM, FPI Boardroom, Units 701 & 702, Atlanta Centre Condominium, #31 Annapolis St., Greenhills, San Juan City. The meeting produced a clear strategic direction: establish an administrative policy obligating LAB manufacturers and importers to recover end-of-life batteries through an, Life-Cycle Accountability/ Extended Producer Responsibility, LCA/EPR-type system. The approach focuses on strengthening existing regulations, enforcing accountability across the supply chain, and ultimately starving illegal recyclers of raw materials. A joint DTI-DENR administrative order (JAO) is the agreed path forward, supported by comprehensive documentation and inter-agency coordination.

An investment of only the first minute of my 13-minute ANC interview will give the reason why the 15% rice tariff has to be increased to 35% when the rice importation ban is lifted (unless importer rice prices spike suddenly). The current 15% tariff was not adjusted upwards when imported rice dropped from \$580 to \$354 a ton. As a result, rice farmers suffered as they never did before. Their P11 palay selling price per kilo did not cover their P14 production cost. Our government decision makers must now make the right tariff decision. Otherwise, our rice farmers will continue to suffer, and our food security imperiled. |
